

I would like to explain how satellite radio provides variety and quality that are not available elsewhere.

I benefit from listening to XM radio and its traffic, weather channel and other music medias that are associated with with it. At the momment, I love the what I listen too. I chose to purchsae this service. and think it would be a disgrace by adding local channels to XM radio. The main reason, I purchased this product/service was to avoid listening to commercials about useless products or in general commericals.

I currently pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I like and deserve.

Thank you.
